**DELIBERATIONS IN SEAC:**

**After deliberations SEAC observed:-**

PP has submitted 43 proposals of prior Environmental Clearance for sand mining from six rivers namely Suki, Bhokar, Tapi, Girna, Wagur and Bori of Jalgaon District. The Public hearing was conducted on 18.05.2020. PP submitted Public Hearing report.

During deliberation it was observed that the size of proposed ghat is only 0.60 Ha. in which total sand reserve is 767 brass at depth of 0.5 meters which seems to be difficult to comply with the guidelines prescribed in the Enforcement & Monitoring Guidelines for sand mining published by MoEF&CC. The prefeasibility report submitted by the PP is very vague and does not establish feasibility of sand mining on the very small proposed area for 0.60 Ha.

In view of above SEAC-1 decided to reject the proposal.

PP is advised to conduct a fresh survey for larger area in the same river bed and prepare pre-feasibility report to ensure its viability and feasibility for sand mining.

**RECOMMENDATIONS OF SEAC:**

**The committee's recommendations:-**

After detailed deliberations, SEAC-1 decided to recommend the proposal for rejection.

### **DELIBERATIONS IN SEAC:**

#### **After deliberations SEAC observed:-**

PP has submitted 43 proposals of prior Environmental Clearance for sand mining from six rivers namely Suki, Bhokar, Tapi, Girna, Wagur and Bori of Jalgaon District. The Public hearing was conducted on 18.05.2020. PP submitted Public Hearing report.

During deliberation it was observed that the size of proposed ghat is only 0.23 Ha. in which total sand reserve is 767 brass at depth of 0.5 meters which seems to be difficult to comply with the guidelines prescribed in the Enforcement & Monitoring Guidelines for sand mining published by MoEF&CC. The prefeasibility report submitted by the PP is very vague and does not establish feasibility of sand mining on the very small proposed area for 0.23 Ha.

In view of above SEAC-1 decided to reject the proposal.

PP is advised to conduct a fresh survey for larger area in the same river bed and prepare pre-feasibility report to ensure its viability and feasibility for sand mining.

### **RECOMMENDATIONS OF SEAC:**
