## **CER - Activities Instructions**

**Subject: Implementation and Post monitoring of CER activities**

Reference: MoEF & CC OM /F.No.22-65 /2017-IA.III dated 01/05/20218

The activities under CER must align with the issues raised during the Public Hearing (PH) or focus on the social needs of the affected communities.

These proposed activities should primarily benefit the areas around the project site, and the proponents must ensure that they address the most pressing local concerns.

**List of CER Activities:**

<b>Sr. No.</b>	<b>CER Activities</b>
1	Infrastructure creation for drinking water supply
2	Sanitation
3	Health
4	Education
5	Skill development
6	Roads
7	Cross drains
8	Electrification (Including Solar power)
9	Solid waste management facilities
10	Scientific Support and awareness to local farmers to increase yield of crop and fodder
11	Rain water harvesting
12	Soil moisture conservation works
13	Avenue plantation
14	Plantation in community areas

1. The proponents and consultants must present the CER activity list to local institutions such as schools, health centers, and Gram Panchayats (GP). Written consent must be obtained to confirm the community's agreement with the proposed activities.
2. The CER activities should follow the priority order outlined above. If a particular need (e.g., drinking water or sanitation) has already been addressed, the next item on the list should be selected.
3. All CER activities must be treated as individual projects, with clear timelines and objectives.
4. Proponents are required to submit half-yearly compliance reports on the progress of CER projects to the Regional Office (RO) and the District Collector's office for monitoring.

## Subject: Consultant's Report on Geological and Hydrological Investigations for Stone Quarry Projects

Geological and hydrological investigations are mandatory for obtaining Environmental Clearance (EC) for proposed stone quarry lands. However, it has been observed that many proposals are reaching the State Expert Appraisal Committee (SEAC) for appraisal without these critical investigations.

Accredited consultants, who typically have sectoral Functional Area Experts (FAEs) on their teams for project-specific studies. It is expected to ensure that the following parameters/aspects are thoroughly investigated and included in the report:

1. Geological structures
2. Land slope and elevation.
3. Slope information, especially in hilly terrains (e.g.,  $<1:5$  or  $>1:5$ ).
4. Slope stability assessment for hilly area.
5. Monsoon groundwater level data.
6. Feasibility assessment of the stone quarry.

Above investigations are crucial for a comprehensive appraisal of stone quarry proposals and all Consultants must submit a study report with their recommendations.
